PROFILE

Cloud Engineering & DevSecOps professional with 10+ years of experience designing and delivering secure, scalable, and high-performance cloud and enterprise solutions. Expertise in cloud architecture, DevSecOps, cybersecurity, microservices, automation, and infrastructure. PSM I certified with strong experience in technical leadership, Agile/Scrum, and delivering reliable technology solutions aligned with business goals.

SKILLS

- **Project & Team Leadership** – Agile/Scrum, project management, cross-functional team leadership
- **Cloud & Infrastructure** – AWS, Google Cloud, Docker, Kubernetes, Ansible, Jenkins
- **Big Data & Analytics** – Elasticsearch, Apache Spark, Google BigQuery, Hadoop
- **Networking & VoIP** – Asterisk, FreeSWITCH, enterprise networking solutions
- **Database Management** – PostgreSQL, MySQL, SQLite (design, optimization, replication)
- **AI, LLM & Agentic AI** – Large Language Models (LLMs), Generative AI, Agentic AI, AI agents, local LLM deployment, open-source AI models, AI-powered automation, LLM integration and API orchestration
- **Microservices & Distributed Systems** – Microservices architecture, RESTful APIs, service-oriented architecture, containerized applications, API gateways, service discovery, distributed systems
- **Programming & Development** – PHP, Python, JavaScript,TypeScript, C/C++, Perl, Shell
- **Frameworks** – Laravel,Codeigniter, Django, React.js, Next.js, Angular, Node.js
- **Cybersecurity & DevSecOps -** SIEM/XDR/SOAR, IDS/IPS, network security, vulnerability management, security monitoring, threat detection, incident response, DevSecOps, server hardening

EMPLOYMENT HISTORY

Assistant Principal Software Engineer II
Brotecs Technologies Limited
June 2017-Current
Dhaka, Bangladesh

- Provide technical leadership and mentorship to junior and mid-level engineers, ensuring the team's technical growth and alignment with industry best practices
- Collaborated with product managers, UX designers, and quality control professionals to build best products
- Design, implement, and maintain CI/CD pipelines to streamline software deployment, ensuring frequent, reliable, and high-quality releases

- Supervise and oversee the technical aspects of multiple projects, ensuring architecture and design decisions align with business requirements
- Lead discussions on feature requirements, algorithmic analysis, and system design, providing clear technical documentation and implementation plans
- Manage the entire life cycle of multiple related complex modules and systems, including feature discussion, algorithmic analysis, documentation, design, coding, testing, maintenance, and result tracking
- Stay updated with emerging technologies and methodologies, advocating for their integration into projects where applicable to maintain a competitive edge

PROJECT HIGHLIGHTS

Smart Cabin Router

- Led the development and successful launch of a cutting-edge smart router for in-flight connectivity.
- Designed a real-time communication protocol for seamless aircraft-to-ground communication.
- Customized Linux OS modules to optimize router performance.
- Utilized Elasticsearch for big data analysis to monitor aircraft data.
- Delivered a robust internet connectivity network setting a new standard in in-flight communication.

Advancements in VoIP Technologies

- Contributed to core development of Asterisk and Freeswitch.
- Collaborated with platforms like DIDWW and DIDX to address diverse telecommunication needs.
- Designed and developed a comprehensive VoIP billing system to streamline operations and enhance user experience.

Development of Virtual Phone Service

- Created a virtual phone service application that provides worldwide phone numbers.
- Designed the server-side architecture for this product and successfully led it to launch, delivering a reliable and innovative communication solution.

SaaS Application Development for RMM Software

- Implemented SaaS applications tailored for Remote Monitoring and Management (RMM) software.
- Designed and developed solutions that optimize IT management and monitoring.
- Oversaw both development and operational aspects, ensuring seamless deployment and ongoing support.

Embedded Systems Development

- Worked on embedded projects to facilitate data transfer between systems.
- Designed and developed efficient protocols for secure and reliable data communication.

EDUCATION

Bachelor of Science
Computer Science and Engineering
American International University-Bangladesh, Dhaka
December 2017

CERTIFICATIONS

Professional Scrum Master™ I (PSM I) – Scrum.org | Issued: March 2025
Ethical Hacker – Cisco Networking Academy (NetAcad) | Issued: July 2026
